

RTTI — Traffic Circulation Plans

Introduction to semantic modelling

A **concept scheme** (in SKOS: *ConceptScheme*) is a structured collection of concepts that carry a fixed, shared meaning within a particular domain. The goal is for everyone working with the model — people and systems alike — to use the same words for the same things. That sounds obvious, but in practice language causes a surprising amount of confusion: what one organisation calls a *measurement point*, another calls a *sensor*, a *location*, or an *observation station*.

A concept scheme solves this by recording, for each concept:

- a **preferred label** (prefLabel) it is known by,
- a **definition** that unambiguously describes what the concept does and does not cover,
- and optionally a **scope note** or **example** to clarify borderline cases.

Concepts rarely stand on their own. They are related **hierarchically** (a vehicle is broader than a truck) or **associatively** (a road user relates to a road segment). These relationships make it possible for queries and analyses to navigate between general and specific concepts, and to make connections between concepts explicit. Within SKOS we use `broader`, `narrower`, and `related` for that.

When a concept also exists elsewhere — in a national or European standard, for instance — we record that as a **mapping relation**. This prevents reinventing the wheel: we link to the source so interoperability with external systems remains possible.

This document describes the concept scheme as it is currently recorded. The following sections list the metadata, every concept, the relationships between them, and — where the model is connected to a data source — how it is linked to that source data.

RTTI — Traffic Circulation Plans

Description

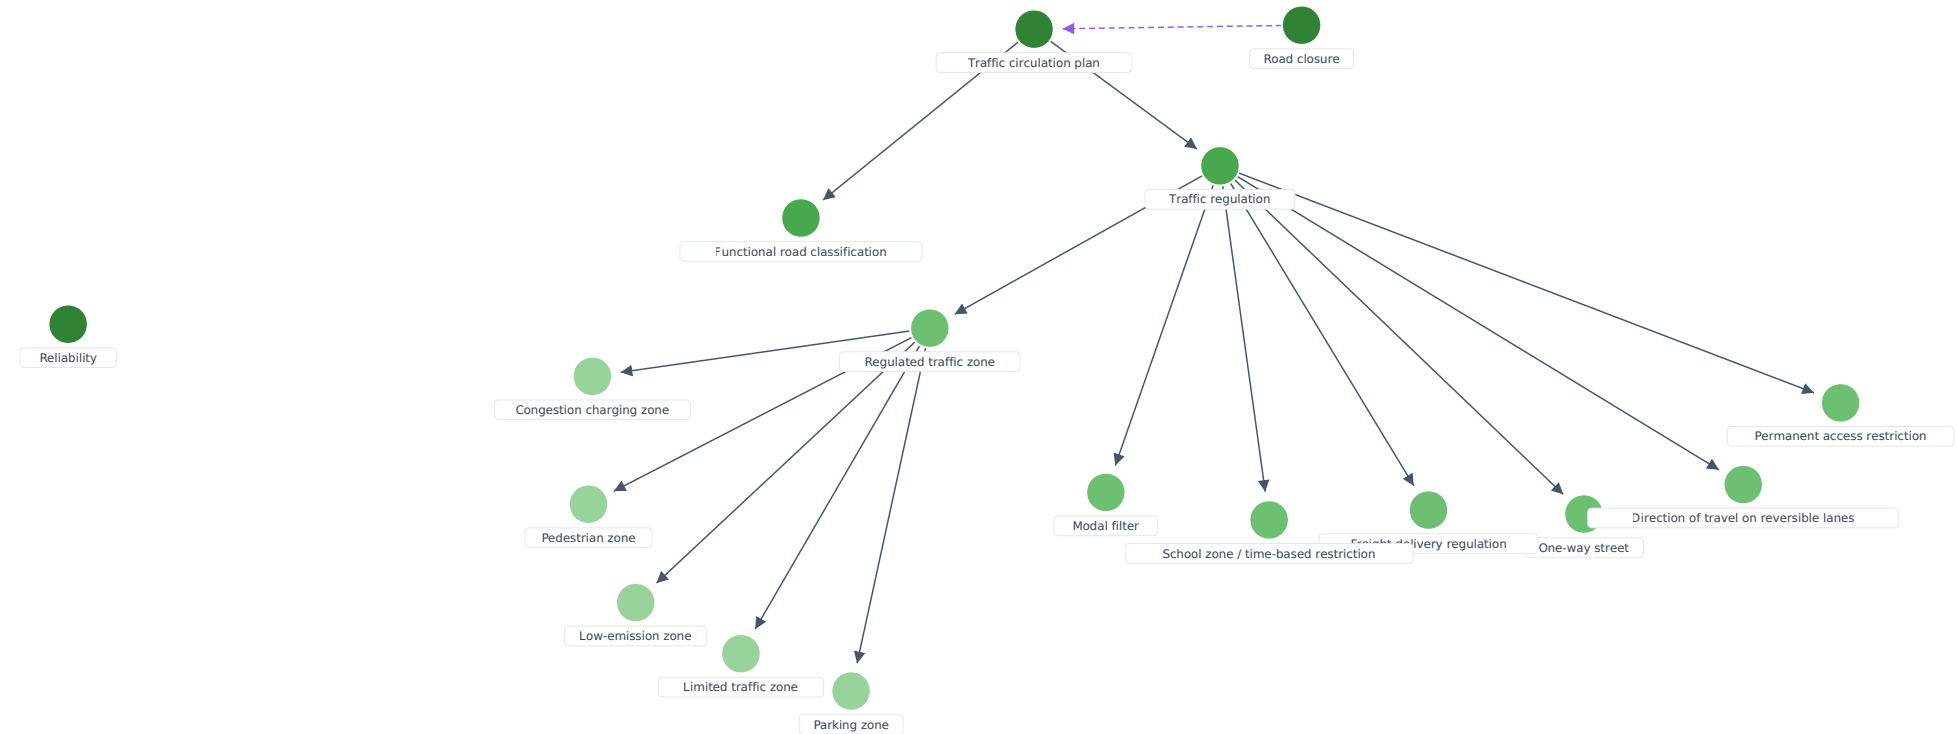

SKOS concept scheme for the priority data type 'traffic circulation plan' under Delegated Regulation (EU) 2022/670 (RTTI), supplementing ITS Directive 2010/40/EU as amended by Directive (EU) 2023/2661. The plan-level concept is the single top concept; constituent regulation and zone concepts are arranged beneath it. Definitions follow the authoritative source wording (legally enumerated data types are normative per the Annex of (EU) 2022/670; prose definitions from the NAPCORE ITS Data Dictionary are indicative). Concepts that have a canonical home in a sibling RTTI scheme are referenced via `rdfs:seeAlso` rather than duplicated.

Metadata

Field	Value
URI	https://gegevenscatalogus.gov/rtti-verkeerscirculatieplannen
Version	0.1.0
Publication status	Draft

Concepts

Traffic circulation plan

Concept details

Field	Value
Definition	The minimum information required for disseminating and describing the content of plans that are developed by local authorities to control and guide traffic flows in response to known and recurring traffic conditions as well as in consideration of seasonality effects and existing limitation and constraints (e.g. existence of school zones).
Alternative labels	TCP
Source	http://data.europa.eu/eli/dir/2023/2661/oj , https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Traffic regulation

Concept details

Field	Value
Definition	Machine-interpretable rules and restrictions that control vehicle or pedestrian movement on the road network to ensure safety and traffic efficiency.
Source	https://docs.datex2.eu/v3.6/trafficregulation/index.html , https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Functional road classification

Concept details

Field	Value
Definition	Classification of road links according to the importance of each road link within the road network (its functional role), as distinct from the physical form of way.

Field	Value
Alternative labels	FRC
Source	https://github.com/NAPCORE/its-data-dictionary , https://inspire.ec.europa.eu/theme/tn

One-way street

Concept details

Field	Value
Definition	Road segments where traffic is allowed to move in only one direction.
Source	https://docs.datex2.eu/v3.6/trafficregulation/index.html , https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Regulated traffic zone

Concept details

Field	Value
Definition	Defined areas with specific traffic rules, including restricted access zones, their boundaries, and the current rules or conditions for vehicles entering these zones.
Alternative labels	UVAR zone
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Direction of travel on reversible lanes

Concept details

Field	Value
Definition	Regulations indicating the direction that vehicles should travel on lanes where the direction is changeable based on traffic needs or time of day.

Field	Value
Source	https://docs.datex2.eu/v3.6/trafficregulation/index.html , https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Permanent access restriction

Concept details

Field	Value
Definition	Permanent legal or physical restrictions or limitations on vehicles to access a specific road link of any type.
Source	https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

Freight delivery regulation

Concept details

Field	Value
Definition	Regulations for delivering freight, such as the designation of certain road links or areas, loading or unloading permissions or prohibitions, and time-related restrictions.
Source	https://eur-lex.europa.eu/eli/reg_del/2022/670/oj , https://github.com/NAPCORE/its-data-dictionary

School zone / time-based restriction

Concept details

Field	Value
Definition	A location- and time-conditioned traffic restriction applied within a traffic circulation plan, such as restricting through traffic during school hours.
Source	https://docs.datex2.eu/v3.6/trafficregulation/index.html , https://github.com/NAPCORE/its-data-dictionary

Modal filter

Concept details

Field	Value
Definition	A point on a road that prevents through motor traffic while allowing cyclists and pedestrians to pass, used as a measure within a traffic circulation plan.
Source	https://github.com/NAPCORE/its-data-dictionary

Low-emission zone

Concept details

Field	Value
Definition	An area where access by the most polluting vehicles is restricted or deterred to improve air quality; one of the urban vehicle access regulation (UVAR) types.
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://github.com/NAPCORE/its-data-dictionary

Limited traffic zone

Concept details

Field	Value
Definition	An area where vehicle access is restricted to authorised users or to specific conditions; one of the urban vehicle access regulation (UVAR) types.
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://github.com/NAPCORE/its-data-dictionary

Pedestrian zone

Concept details

Field	Value
Definition	An area reserved primarily for pedestrians where general motor traffic is prohibited or restricted; one of the urban vehicle access regulation (UVAR) types.
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://github.com/NAPCORE/its-data-dictionary

Congestion charging zone

Concept details

Field	Value
Definition	An area where a charge is levied on vehicles in order to manage congestion; one of the urban vehicle access regulation (UVAR) types.
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://github.com/NAPCORE/its-data-dictionary

Parking zone

Concept details

Field	Value
Definition	An area subject to specific parking regulations or charges; one of the urban vehicle access regulation (UVAR) types.
Source	https://docs.datex2.eu/v3.6/controlledzone/index.html , https://github.com/NAPCORE/its-data-dictionary

Road closure

Concept details

Field	Value
Definition	Dynamic information disseminating the closure of road links of any type, which may be directional and either planned or unplanned.
Source	https://github.com/NAPCORE/its-data-dictionary

Reliability

Concept details

Field	Value
Definition	The reliability for datasets or data items
